Artwork for white and blue backgrounds is transparent. The black version includes its black background in the file. SVGs contain vector paths, including the wordmark. Also available as a ZIP

Using the logo

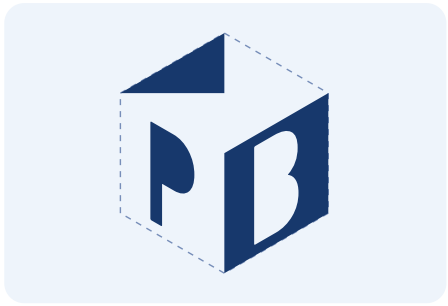

Leave clear space

Leave at least ¼ of the symbol height on every side. For the full logo, measure using its symbol.

Minimum digital size

Symbol: 32 px wide. Full logo: 160 px wide. Check print legibility at the actual output size.

A regular hexagon

Six equal sides and 120° interior angles. Preserve the logo's aspect ratio.

Do not stretch

Do not rotate

Do not recolor

Keep contrast

Typography

Outfit ↗

Headings · 500–600

You used to give AI tasks. Now it works for you.

Inter ↗

Body 400 · emphasis 600–700

Promptbook hands ongoing work to AI agents that run on your computer or server and follow your rules.

The full wordmark uses Inter Medium (500) for “prompt” and Inter Bold (700) for “book” at the same size. The entire “ptbk” abbreviation uses Inter Medium (500).

Příliš žluťoučký kůň úpěl ďábelské ódy. 0123456789

Copy to use

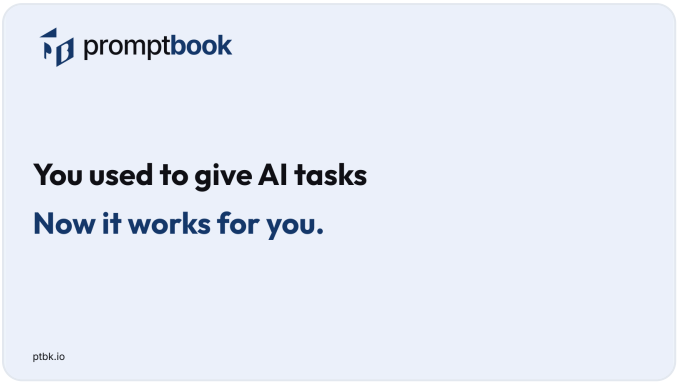

Write Promptbook in text. The visual wordmark is promptbook, without a dot.

The official abbreviation is `ptbk` and is written in lowercase. Use the same spelling for the CLI command.

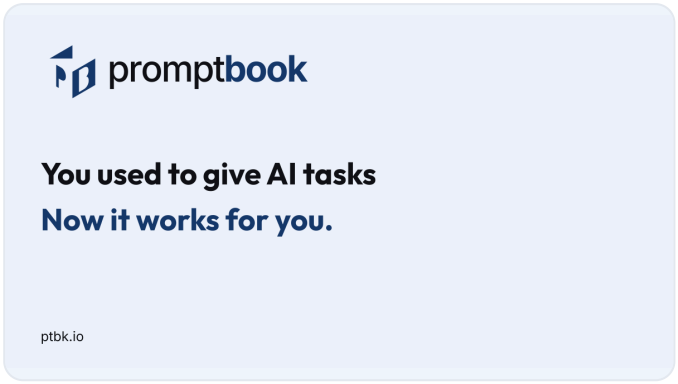

Main message	You used to give AI tasks. Now it works for you.
One sentence	Promptbook hands ongoing work to AI agents that run on your computer or server and follow your rules.
Short description	Hand over a responsibility. Set the rules. Start your agents. They work independently. They ask only when they need you. You can check in at any time. The engine runs on your computer or server, with your files and your choice of models.

> **Be specific**
>
> “Agents draft a reply using your CRM history.” Instead of “Revolutionary AI transforms your business.”

Partner website

Use the complete logo linked to ptbk.io. Keep your own brand separate.

SVG PNG

SVG templates are editable and use Outfit and Inter. PNGs have the fonts rendered in.

Promptbook robot

The mascot accompanies examples of agents on the web, in slides and in animations. Use the Promptbook logo to identify the brand.

Downloads

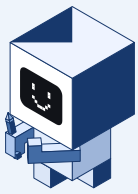

3D model · GLB SVG PNG · 1024 px

The GLB contains the working pose. In Blender, choose File → Import → glTF 2.0 and open the downloaded file. The head, torso, feet, arms and pen are separate named parts.

Making your own poses

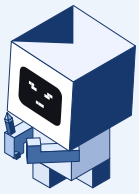

- The torso edge is 61.8% of the head edge. Each foot is 44% of the torso edge. Place the feet diagonally under the torso with a gap between them.
- Keep the arms as continuous L shapes. Leave space between the free arm and the chin. From the front, the pen passes through the center of the left grip.
- Keep the ink-blue triangle on top, the pale surfaces and the dark screen with a pixel expression.

Five poses

Working

Pen in its grip and a pixel smile. The default pose for the homepage and examples of work.

Thinking

A slight head tilt, changed eyes and a neutral mouth. Use while the character looks for an answer.

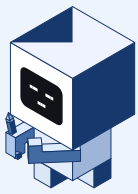

Assembling

The head rises above the torso. Use when the character comes together or changes form.

Finished

A little hop and a lift of the free arm. Use to acknowledge completed work.

Resting

Closed eyes and a relaxed expression. Use while waiting or paused.
